RG CABLE CLEANER

TECHNICAL INFORMATION

RG Cable Cleaner is a liquid used to remove dirt, dust and grease on fiber optic cables.

RG Cable Cleaner cleans and de-ionizes without damaging the glass fibers.

RG Cable Cleaner completely evaporates leaving no residue on the glass fiber surface.

Using a cloth or sponge, apply the liquid directly onto the fiber optic cable. Then thoroughly clean the fiber optic cable with a dry cloth.

RG Cable Cleaner can also replace products that are used for the same purpose (such as isopropyl alcohol and ethyl alcohol, see Flammable Hazard Warnings) with the added benefit of not having to handle flammable materials. RG cable cleaner is economical in consumption and thus saves money.

ATTRIBUTE

Appearance	Transparent liquid
Odor	Odorless
Melting point	0°C
Boiling point	100°C
Density	1.0g / cm ³
Solubility	Completely soluble in water

CONTAINER

Cod. RG001-12.01	Bottle 500 ml
